

MANOJ JOHN AXELSSON

Linköping || 0762 542 956 || mr.mjaxelsson@gmail.com

PHILOSOPHY & PROFILE

I help organizations improve processes, reduce complexity and build sustainable systems by combining production engineering, Lean methodology, Six Sigma problem-solving and modern software development.

By combining my background in both industrial manufacturing and software architecture, I focus on how components interact. I leverage modern AI-assisted development workflows to build testable, maintainable systems, applying Six Sigma quality principles and root cause analysis directly to software quality, testability, and operational stability.

CORE COMPETENCIES

Lean and Six Sigma Green Belt & Methodology

Data-driven Continuous Improvement

Process Analysis & Mapping

Root Cause Analysis

Statistics & Fact-based Decision Support

Process Development & Improvement

Software Development (React, Node.js, TypeScript)

Production & CNC Technology

Quality Assurance

Data Collection & Information Quality

Documentation & Follow-up

Communication & Relationship Building

Personnel Management & Entrepreneurship

Structured & Meticulous Work Style

Team Collaboration

Autonomous Performance

HOW I WORK

My process is rooted in disciplined engineering methodologies, combining Lean and Six Sigma problem-solving with modern software design. I believe in modeling reality and finding root causes before writing code.

1 UNDERSTAND

Map out the current state, identify stakeholders, and define system boundaries.

2 ANALYSE

Measure baseline performance, perform root cause analysis (5 Whys, Ishikawa), and identify waste.

3 SIMPLIFY

Strip away unnecessary complexity and eliminate waste (Muda) in the process.

4 IMPROVE

Design and deploy robust, automated, and long-term scalable solutions.

5 STANDARDIZE

Document the architecture, establish automated testing, and define stable procedures.

6 TRAIN & VERIFY

Train the respective operators in the new standard and establish self-inspection methods to ensure workers can verify process results on the line.

7 MEASURE

Audit metrics (KPIs) and quantify the actual improvement against baseline goals.

8 REPEAT

Cycle back continuously to identify new optimization vectors (Kaizen/PDCA).

PROJECTS AS EVIDENCE

Engineering projects are more than just programming languages. They are evidence of structured problem-solving. Every project I deliver is documented using this framework:

STRUCTURED PROJECT DOCUMENTATION TEMPLATE

CHALLENGE

What system constraint or inefficiency was identified?

ANALYSIS

What data was collected via DMAIC and FMEA? How were root causes mapped using Pareto, control, and fishbone charts?

SOLUTION

What technical or process solution was implemented?

OUTCOME

What were the measurable performance gains?

LESSONS LEARNED

How was the solution standardized to prevent recurrence?

SYSTEMS ARCHITECTURE & VERIFICATION REPOSITORY

This methodology is formally validated through actual implementation. Access the source code, system architecture schemas, and operational validation files in the public repository:

EXPERIENCE & EDUCATION

2025 – 2026

Fullstack Software Developer

Lexicon AB – Linköping (Node.js, React, TypeScript)

- Completed an intensive Fullstack program in modern web development (TypeScript, Next.js, Tailwind CSS, PostgreSQL) focusing on Bulletproof React architecture, separation of concerns, testability, and long-term maintainability.
- Applied modern development practices including AI-assisted coding, cloud deployment, and basic CI/CD concepts.
- Practiced project-based development with Git for version control and documentation (clean commit history, branch management, and pull requests for collaboration).

2024

Six Sigma Green Belt Certification

KPMG

Professional certification program focused on data-driven process improvement, root-cause analysis, and statistical quality assurance:

- Proactive risk mitigation and defect prevention via FMEA (Failure Mode and Effects Analysis) and DMAIC project methodology.
- Statistical data analysis, process capability index, mistake-proofing (Poka-Yoke), and statistical process control (SPC) with Shewhart charts and control plans.

2022 – 2023

Production Development Engineering (Industry 4.0)

Higher Vocational Education (Diploma)

Higher Vocational Diploma in Lean manufacturing, digital manufacturing, industrial automation, quality management, and data-driven process improvement.

2017 – 2025

Production Engineer / CNC Technician

Swedish Manufacturing Industry (via Staffing & Recruitment Agencies)

- Completed multiple assignments in the Swedish manufacturing sector, focusing on precision, operational stability, and quality assurance in accordance with established ISO processes.
- Collaborated closely with operators, technicians, production planning, and management to minimize waste and optimize production efficiency.

2017

Green Card Certification for CNC Operations

Skärteknikcentrum Sverige

National professional certification for standardized CNC machining: technology & programming, tolerances, metrology, cutting technology, and machine operations.

2017 – 2018**CNC Technician with CAD/CAM***Vocational Education*

Comprehensive vocational program specializing in advanced manufacturing, CAD/CAM 3D-design, and continuous improvement systems.

1998 – 2008**Leadership & Customer Experience***Hotel & Tourism Business Owner (India, ~30 employees)*

Owned and operated a business in the hospitality and tourism sector in India, employing approximately 30 staff members. Responsible for client care, operational strategy, and personnel management, developing key competencies in strategic guest relations, Change Management, and leading multicultural teams.

1993 – 1996**Diploma in Hotel Management, Catering Technology & Applied Nutrition [IHMCTAN]***IHM, Dadar - Mumbai*

Three-year program emphasizing operational leadership, strategic customer service (Guest Relations), and day-to-day outlet adjustments.

1987 – 1992**Bachelor of Arts (Economics)***Kerala University*

Academic program in economics, validated by UHR as equivalent to a Swedish Higher Education Diploma, specializing in micro/macroeconomic theory, data collection, and structured problem solving.

RECOMMENDATIONS

"Manoj has contributed with a positive atmosphere, and shown great enthusiasm & engagement both as a frequent participant and as a volunteer organizer at several of the GameJams by LiTHe kod, while I was responsible for organizing the events."

Morgan Nordberg — Student at Linköping University (Former Manager (GameJam Organizer))

"Manoj is a pleasant person who spreads joy, is dedicated to his work, and makes sure everyone feels included 🌸"

Isac Lindh — Developer | UX designer (Studied together)

"Manoj is a very pleasant and dedicated colleague with a positive attitude. He easily builds good relationships and contributes to a good atmosphere in the workgroup through his helpful and social nature. Furthermore, he is persistent in his work and does not give up when faced with challenges, but works methodically until the problems are solved."

Pernilla Johansson — Production Technician / Team Leader (Co-worker - Part AB, Kalix)

"I had the pleasure of being a customer of Manoj, and I can confidently say he is one of those rare professionals who leaves a lasting impression. His genuine smile, positive energy, and welcoming attitude make every interaction enjoyable, but what truly sets him apart is his remarkable intelligence and ability to understand exactly what people need. Manoj combines professionalism with authenticity, creating an experience that feels both effortless and personal. He consistently goes above and beyond, and his passion for excellence is evident in everything he does. I highly recommend Manoj to anyone looking for someone who is knowledgeable, trustworthy, and an absolute pleasure to work with."

Mickey Bosco — Hospitality Group Owner (Client (India))

"I was one of Manoj's teachers at the Higher Vocational Education. He is a diligent problem solver who strives to achieve great results. If I needed such a person, I would hire him."

Lars-Erik Lindström — IT Management & Software Sales Representative (Teacher - Higher Vocational Education)
