

Contact Information

Name: Manoj John Axelsson

Role: Fullstack Software & Systems Optimization Engineer

Location: Linköping, Sweden

Phone: +46 762 542 956 | Email:

mr.mjaxelsson@gmail.com

Portfolio: manojaxelsson.se | GitHub: github.com/Manoj-Axelsson | LinkedIn: linkedin.com/in/manoj-axelsson

Citizenship: Swedish Citizen

Professional Summary

A disciplined Fullstack Developer and systems engineer bridging modern web technologies with a robust background in precision industrial engineering and KPMG Six Sigma Green Belt quality methodologies. Expert in leveraging React, TypeScript, and Node.js alongside AI-assisted development tools to build testable, maintainable software. Applies DMAIC, FMEA, and process optimization directly to code quality and software reliability. A pragmatic, T-shaped professional with prior experience in business ownership and team leadership, motivated by solving complex technical challenges for users and creators.

Core Technical Competencies

Frontend Development: React, TypeScript, Next.js, HTML5, CSS3, Tailwind CSS, Responsive Design.

Backend & Databases: Node.js, Express, PostgreSQL, RESTful APIs, SQL.

Systems Quality & QA: Six Sigma Green Belt (DMAIC, FMEA, Poka-Yoke), Quality Assurance, Root Cause Analysis, Code Reviews.

Infrastructure & DX: CI/CD concepts, Git/GitHub, Cloud Platforms (Vercel, render), AI-Assisted Workflows (Copilot, Agentic coding), Telemetry & Analytics.

Languages: English (Fluent), Swedish (Fluent), Malayalam (Native).

Professional Experience

Software Engineer (Fullstack Projects) | Lexicon AB & Open Lab

2025 – Present (Linköping, Sweden)

Developed end-to-end web applications applying robust architecture principles (Bulletproof React) focusing on separation of concerns, long-term maintainability, and testability.

Built and managed relational database schemas using PostgreSQL and hosted RESTful APIs in Node.js.

Created and maintained an open-source validation laboratory (Rubber Duck Works) to showcase system architectures, automated testing configurations, and process documentation.

Implemented telemetry, custom event tracking, and web analytics to monitor application performance and user flows in production.

Production Engineer / CNC Technician | Swedish Manufacturing Industry

2017 – 2025 (Sweden)

Led technical CNC machining, programming, and operations in high-demand environments requiring micron-level precision and strict quality compliance.

Managed quality control protocols, standard operating procedures, and technical documentation according to industrial ISO standards.

Collaborated in cross-functional teams with operators, production planners, and managers to reduce manufacturing waste, increase uptime, and run preventive maintenance.

Hospitality Business Owner & Operator | Hotel & Tourism Industry

1998 – 2008 (India)

Managed and directed full hotel and tourist operations with over 30 employees, overseeing budgeting, operational strategy, and HR.

Established high-end customer service models and guest relationship systems (CRM) to drive repeat business from international clients.

Led Change Management processes, adapting service models to changing market trends and leading multicultural teams.

Education & Certifications

Fullstack Software Developer (Diploma) | Lexicon AB (Linköping, Sweden) — 2025 – 2026

Focus: React, Node.js, TypeScript, PostgreSQL, Bulletproof React architecture, Git collaboration.

Six Sigma Green Belt (Professional Certification) | KPMG — 2024

Focus: Data-driven process improvement, DMAIC, FMEA, statistical data analysis, mistake-proofing (Poka-Yoke), control charts.

Production Development Engineer (Higher Vocational Diploma) — 2022 – 2023

Focus: Lean Manufacturing, Digitalization, Industrial Automation, Quality Management.

CNC Technician & CAD/CAM Programming (Diplomas) — 2017 – 2018

Focus: CNC Programming, 3D design (CAD/CAM), automated manufacturing.

Bachelor of Arts in Economics | Kerala University (India) — 1987 – 1992

Focus: Micro/macroeconomics, statistical data analysis.

Diploma in Hotel Management & Catering Technology | IHM Bombay (India) — 1993 – 1996

Focus: Operational leadership, service quality standards.
